Aquarion Water Company to Host Public Meeting in Westport

Planned Water System Improvements and Water Conservation to be Discussed

BRIDGEPORT, CONN. – June 21, 2017 – Aquarion Water Company will host an informational meeting on June 28, 2017 at 6:30 p.m. in Westport’s Town Hall Auditorium, located at 110 Myrtle Avenue. Aquarion will present and answer questions on planned water system improvements for Westport, and update residents on its water conservation program.

In addition to scheduled distribution system improvements on Long Lots Road, Myrtle Avenue, and the Post Road; Aquarion is planning improvements to its water storage location on North Avenue, across from Staples High School. Nearing the end of its useful life, the existing tank no longer meets the water needs for the Town of Westport. Aquarion will present plans to replace the existing tank with two new tanks. This increased capacity will help ensure Westport has adequate storage for its current and future needs.

Already under construction, the first phase of Aquarion’s annual water main improvement plan includes work on Newtown Turnpike. This project will install more than 9,000 feet of new 12” water main and will greatly improve water distribution capacity.

Residents with project-related questions may contact Mark Fois, Senior Engineer, at (203) 337-5941. For service or water-related issues, please contact Aquarion Customer Service at 1-800-732-9678.

About Aquarion Water Company:

Aquarion Water Company is the public water supply company for more than 625,000 people in 51 cities and towns throughout Connecticut, as well as serving customers in Massachusetts and New Hampshire. It is the largest investor-owned water utility in New England and among the seven largest in the U.S. Based in Bridgeport, Conn., it has been in the public water supply business since 1857. Across its operations, Aquarion strives to act as a responsible steward of the environment and to assist the communities it serves in promoting sustainable practices.
