**Aquarion Water Company Announces
Water Main Cleaning and Relining Project in Seymour**
Silvermine Road Project Scheduled to Begin September 16th

BRIDGEPORT, CONN. – September 13, 2013 – Aquarion Water Company today announced a water main cleaning and relining project on Silvermine Road.

Scheduled to begin September 16, 2013, the work is expected to be completed in six to eight weeks.

During this project, existing water mains will be taken out of service and temporary above ground water lines and fire hydrants will be installed in the roadway shoulders to serve customers. Short scheduled water outages will occur when customers are connected to temporary water lines, and again when customers are reconnected to the newly lined water main.

Due to construction, customer should expect minor traffic delays and detours during the working hours of 7:30 a.m. to 3:30 p.m. John J. Brennan Construction, Luch's Consulting Engineers, and Heitkamp, Inc. were chosen as contractors for this water main relining project.

“We greatly appreciate residents’ patience during this project,” said George Logan, Aquarion’s Director of Engineering & Planning. “We will work closely with our customers, contractors and local officials to coordinate the work and minimize disruption.”

Customers with project-related questions may contact Steve Glowa, Aquarion’s Pipeline Program Coordinator, at (203) 362-3061. For service or water-related issues, contact Aquarion Customer Service at 1-800-732-9678.
