Aquarion Acquires Fifth Water System in Brookfield, Connecticut

Connecticut's top-rated water company purchases Indian Fields Water System

December 4, 2012 – Aquarion Water Company today announced the purchase of Indian Fields Homeowners Association's water system, which is located one mile from the center of Brookfield, Connecticut. This independent system currently serves approximately 160 Brookfield residents.

“We are pleased to continue our expansion in the town of Brookfield, and we look forward to providing these new customers with the same safe and reliable water service,” said Charles V. Firlotte, Aquarion President and CEO. “This continues our goal of reducing the number of small water systems throughout the state.”

“We are pleased to see Aquarion continuing to acquire small water companies and consolidating them into Aquarion's system. Aquarion has the financial strength and excellent customer service that will benefit its customers in Brookfield,” Brookfield First Selectman Bill Davidson said.

In 2011 and 2012, Aquarion purchased and integrated 56 Connecticut water systems into its portfolio, strengthening the company's ability to deliver high quality water to communities throughout the state.

About Aquarion Water Company:

Aquarion Water Company is the public water supply company for more than 625,000 people in 47 cities and towns throughout Connecticut, as well as serving customers in Massachusetts and New Hampshire. It is the largest investor-owned water utility in New England and among the seven largest in the U.S. Based in Bridgeport, Conn., it has been in the public water supply business since 1857. Across its operations, Aquarion strives to act as a responsible steward of the environment and to assist the communities it serves in promoting sustainable practices.
